"Let's see how we bring ideas to life"

Hotel Materra, located in Čepin, Croatia, and completed in 2023, presents a carefully designed interior furnished with selected pieces including Dika, Cot, Nauvik, and the Ruvo low table. These products contribute to the overall ambiance of the hotel, enhancing both its aesthetic quality and functional value. Conceived as a sanctuary of tranquility, the space combines contemporary design with comfort, creating a refined and inviting atmosphere for guests while supporting a range of everyday uses.

Hotel Materra

The interplay of materials and forms enhances functionality and aesthetics, expressed through clean lines, balanced proportions, and thoughtfully composed elements. The furniture integrates seamlessly into the interior, contributing to a sense of visual harmony and spatial clarity. This considered approach supports flexibility in use and reinforces the calm, cohesive character of the space, while maintaining a timeless and elegant design language throughout.

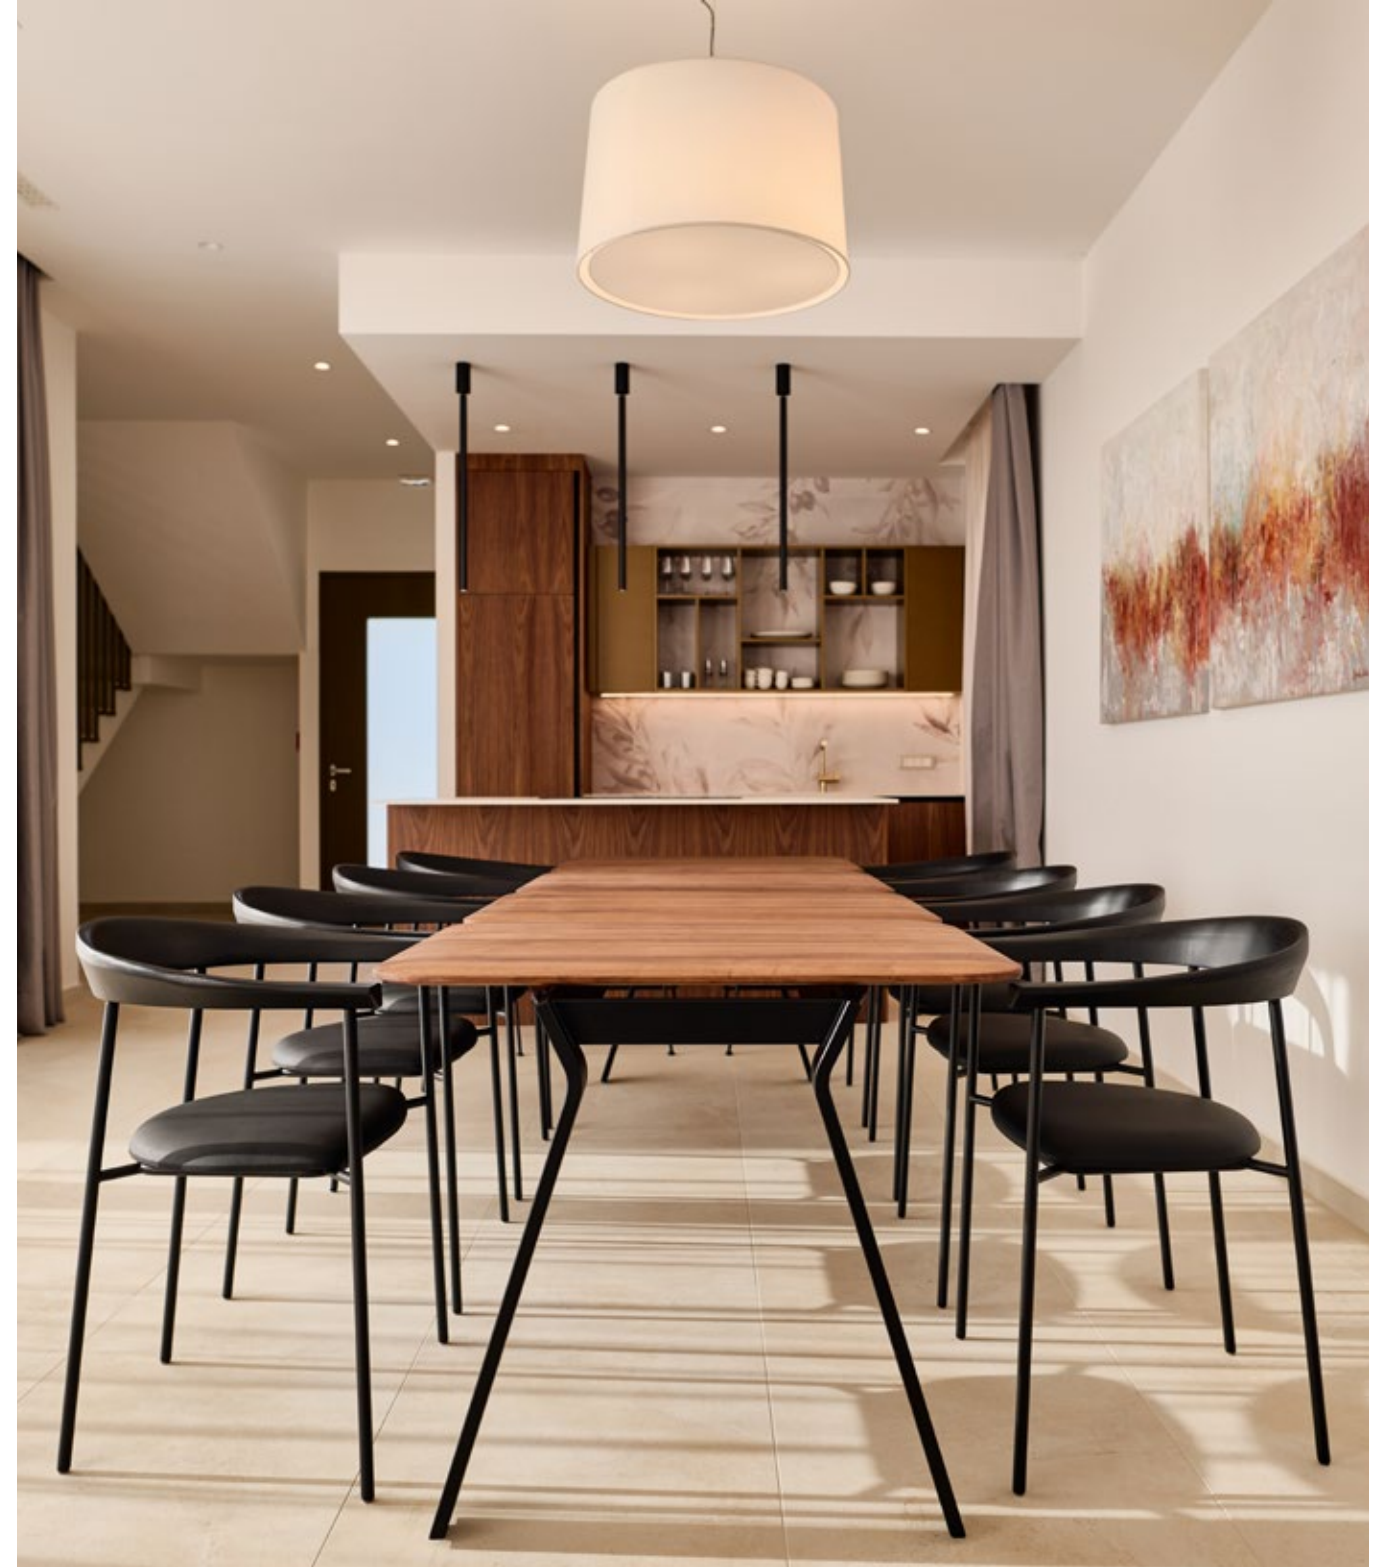

Located in Tar, on a plateau between Poreč and Novigrad, this project comprises the furnishing of 23 luxury villas with private pools, completed within a landscape defined by centuries-old olive groves and a rich cultural heritage. The villas offer a refined balance between the authenticity of the Istrian setting and the comfort of contemporary living.

Resort Taria

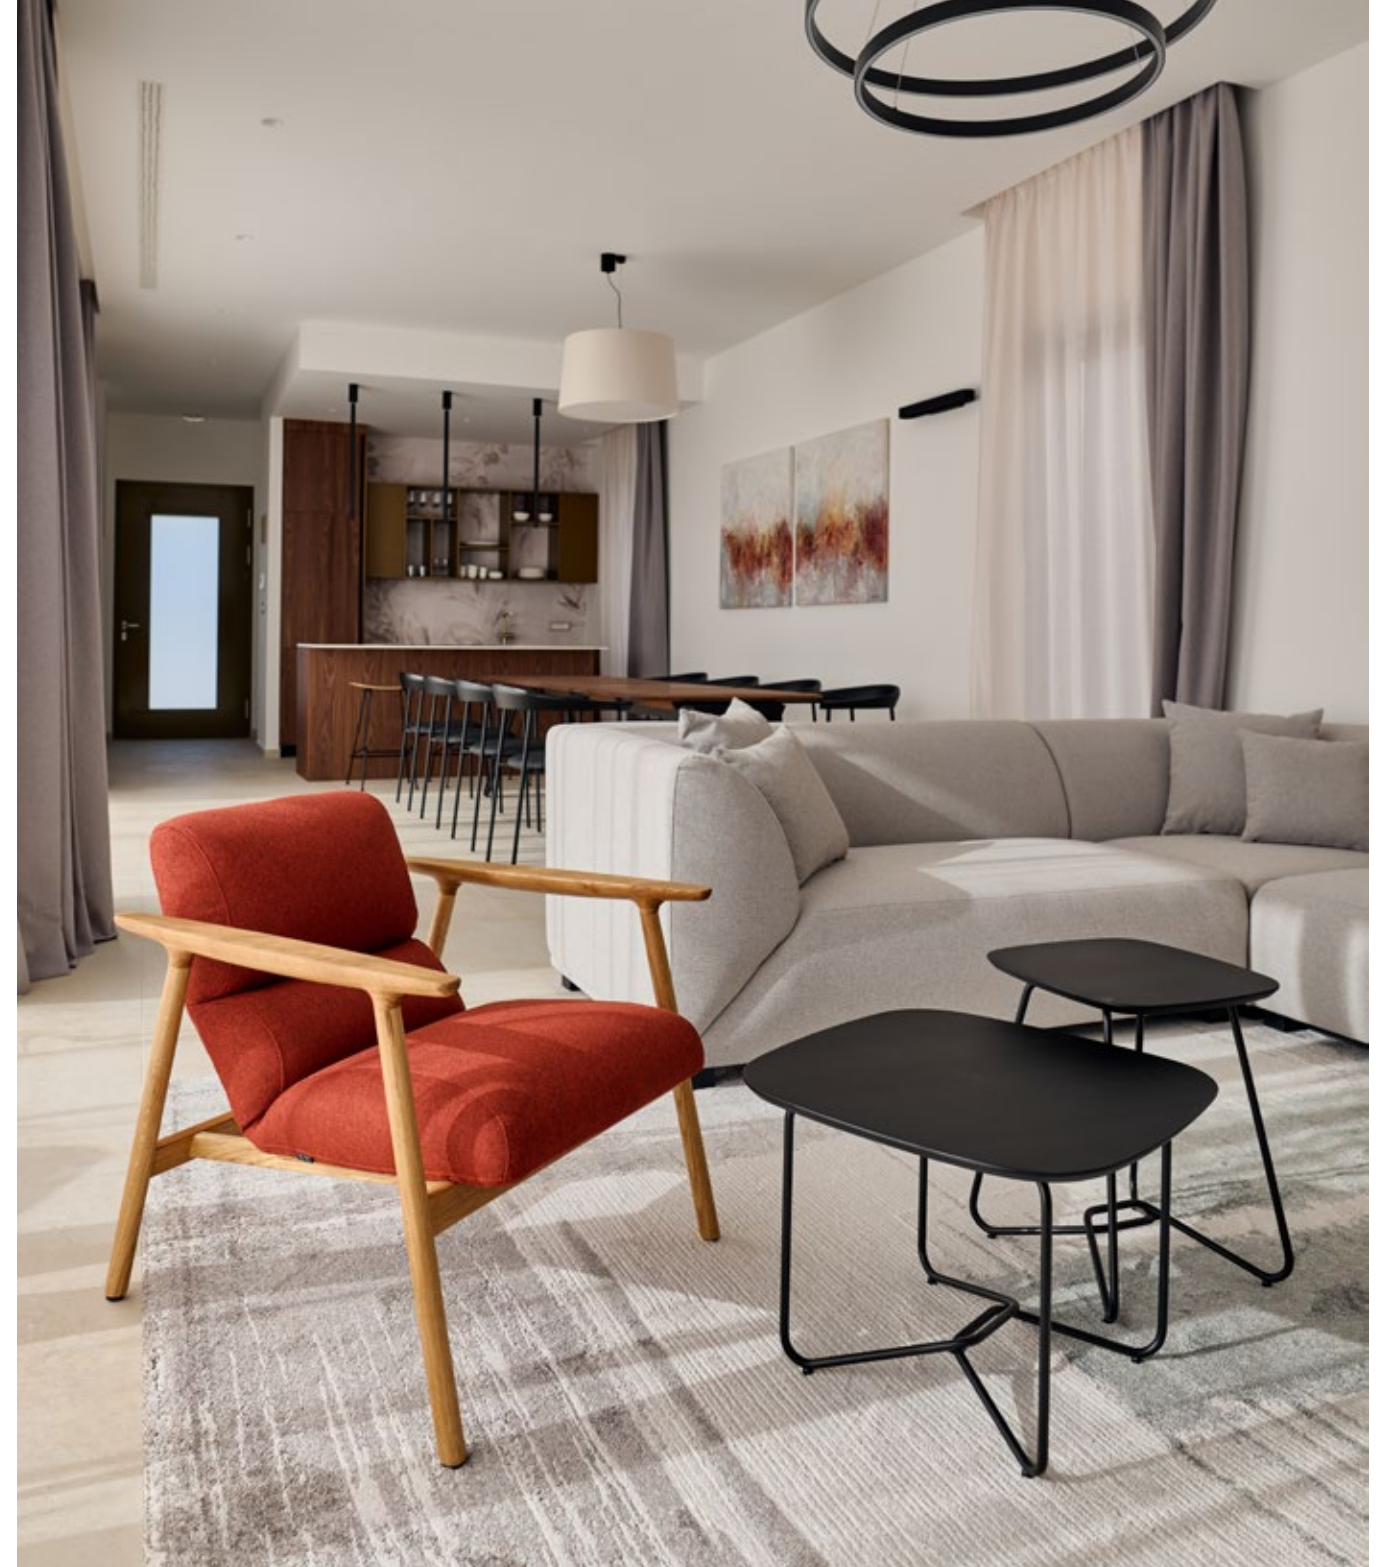

Particular attention was given to every detail, from the selection of furniture to the overall interior concept that complements the architectural language of the space. The furnishing includes the Nauvik chair, Cot chair, Dika armchair, and Tabure Skupa, alongside the Ala table and Ruvo low table, all carefully integrated to create a cohesive and harmonious interior expression.

The result is a collection of interiors that provide guests with a sophisticated, comfortable, and memorable stay. This project introduces a new dimension of luxury tourism in Istria, where nature and modern design come together in a harmonious and balanced experience.

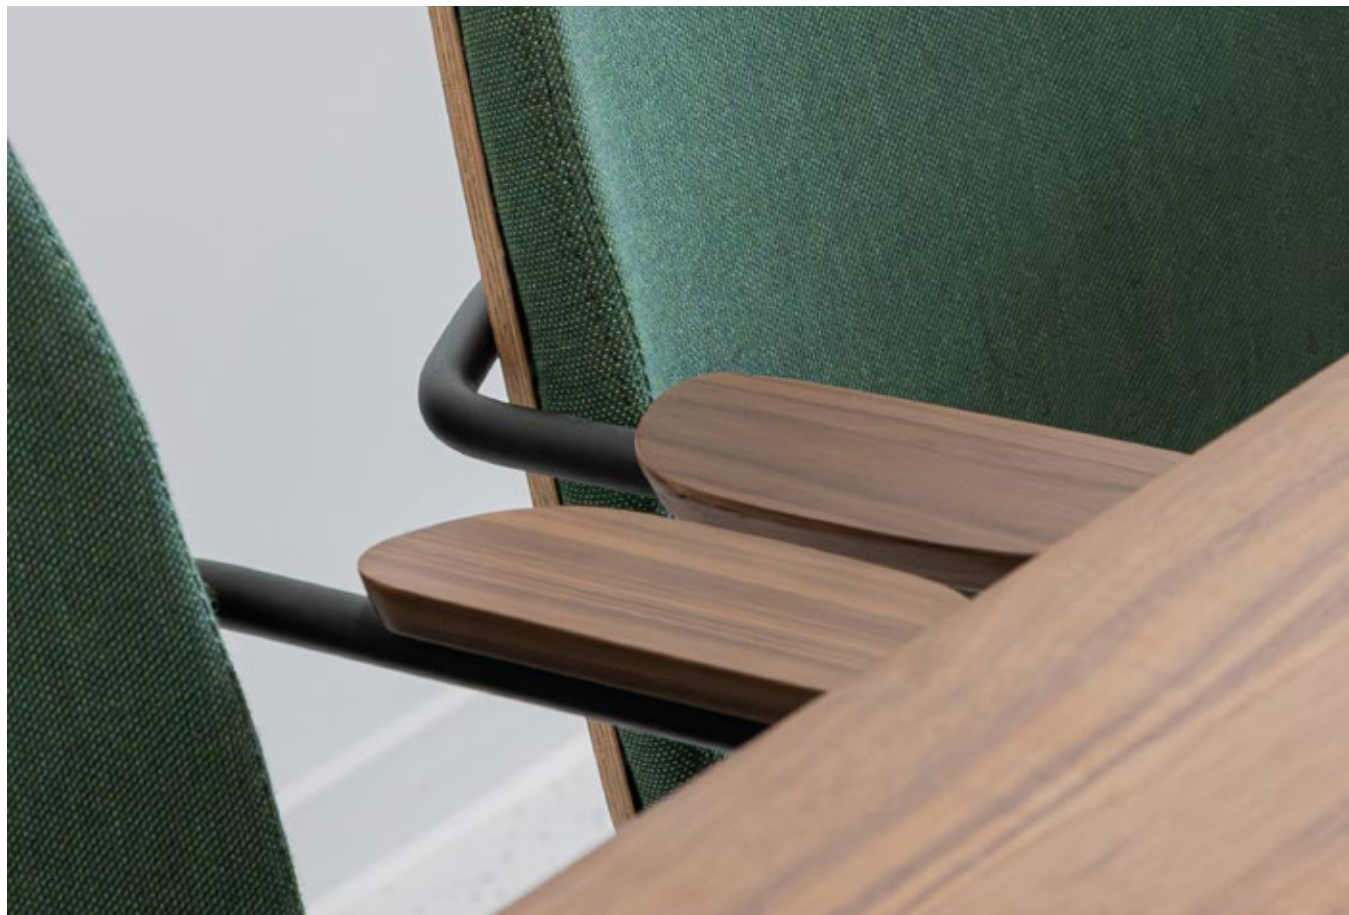

A workspace is defined as much by how it functions as by how it feels. For this office in Split, selected pieces from our collection were integrated into a carefully composed interior, supporting everyday work through proportion, comfort, and visual continuity.

The space is conceived to balance focused individual tasks with shared activities, creating an environment that feels both structured and relaxed, while maintaining a clear and consistent design language throughout.

Office UHY

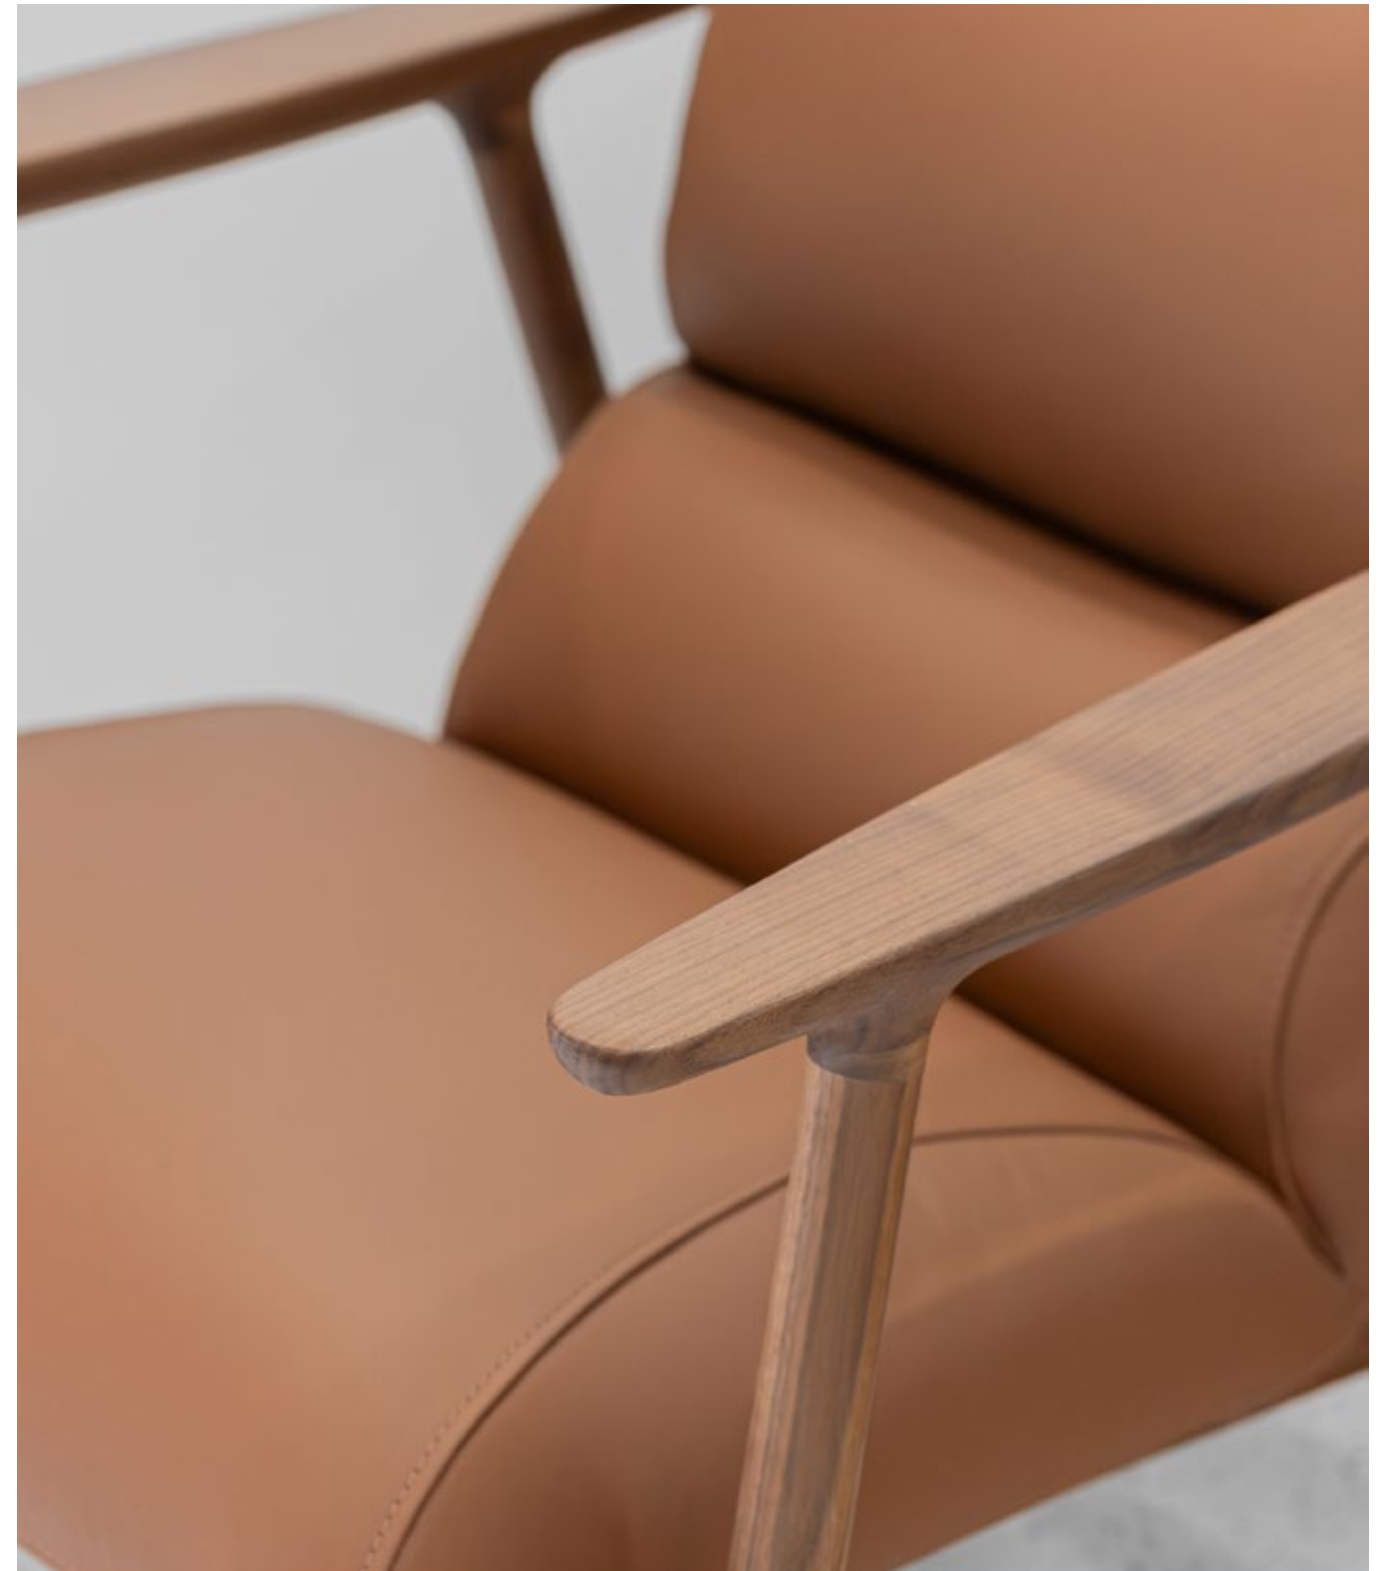

The office interior is furnished with Ala tables and Svib chairs, creating a cohesive and functional workspace. The design emphasizes both collaboration and individual focus, with furniture that supports everyday use through ergonomic comfort and visual consistency. This combination enhances shared areas, encourages informal interaction, and establishes a unified, contemporary atmosphere throughout the office.

The Dika armchair introduces a more relaxed and intimate dimension to the office environment, complementing the structured workspace with a sense of comfort and ease. Its warm materials and refined craftsmanship create a welcoming atmosphere, encouraging moments of pause and informal interaction. Integrated into the overall interior, it enriches spatial diversity while maintaining a consistent design language.

Bolta chairs, Ala tables, and Cot chairs work together to define a balanced and cohesive workspace. Their interplay of materials and forms supports both functionality and visual clarity, enabling smooth transitions between different areas of use. This combination enhances everyday usability while maintaining a calm, consistent, and thoughtfully articulated interior environment.

University of Rijeka

The University of Rijeka Innovalab is designed as a multifunctional pavilion for presentations, conferences, and workshops, supporting a range of activities through a clear and adaptable spatial setup. Bolta chairs are used throughout the interior, providing a consistent and practical seating solution, while their lightweight structure allows for easy reconfiguration. This approach ensures flexibility in use, encourages interaction, and maintains a functional and well-organized environment.

This office for Bruketa/Žinić/Grey is defined by a bold and immersive use of color, where a monochromatic pink environment creates a distinctive and cohesive spatial identity.

The interior is conceived as both a workspace and a meeting environment, supporting different modes of collaboration within a visually unified setting. Bolta chairs, finished in matching tones, are used throughout the space, reinforcing the overall concept while providing comfort and functionality in everyday use. Their form allows for flexible arrangements around meeting tables, adapting easily to different group sizes and working scenarios.

The continuous use of curtains softens the architecture, shaping the space while introducing a sense of depth and intimacy. This approach creates an atmosphere that is both expressive and controlled, where color, furniture, and spatial elements work together to support interaction, focus, and a dynamic working environment.

Bruketa/Žinić/Grey

Bakery Mlinar

Mlinar bakeries in Croatia are equipped with our Cot chairs, introducing a consistent seating element into everyday urban settings. This marks an important step and the beginning of a broader collaboration, bringing a locally designed product into familiar city environments. Designed in Slavonia and returned to everyday use, the chairs become part of daily routines, from a quick coffee to a short pause by the window. Their presence supports both functionality and comfort, fitting naturally into the rhythm of the bakery setting. This approach connects design with everyday use, creating a space that feels approachable, continuous, and well integrated into the life of the city which earned it the Red Dot design award in 2023.

Bakery Hleb & kifle

Bakery Hleb & kifle in Serbia is furnished with our Cot chairs, introducing a refined and consistent seating element into the interior. Their compact form and balanced proportions support everyday use, integrating naturally into the rhythm of the space. Positioned along counters and window areas, they accommodate both quick stops and quieter moments of pause. This considered placement enhances functionality while maintaining visual clarity and order. The chairs contribute to an atmosphere that feels both practical and composed, where movement, use, and spatial flow come together in a simple and cohesive way earning the chair the Red Dot design award in 2023.

Lounge bar Zona

Lounge bar Zona in Đakovo in the heart of Slavonia region, is conceived as a dynamic and inviting interior that balances everyday use with moments of social interaction. The space is organized through a variety of seating settings, from bar areas to more relaxed lounge zones, allowing it to adapt fluidly to different rhythms throughout the day. Ala tables are paired with Bolta, Cot, and Nauvik chairs, complemented by the Dika armchair, Ruvo low table, and Taraba, all carefully integrated into the overall composition.

Each element contributes through its form and material, creating a cohesive environment defined by clarity, comfort, and understated elegance.

Cot

The seamless interplay between form and function creates a dynamic yet timeless piece suited for contemporary interiors. Its slender yet sturdy structure, formed by an interwoven metal base, provides stability without compromising lightness, making it a refined addition to any space. From sophisticated bars and stylish kitchens to vibrant workspaces, Cot effortlessly adapts, adding a touch of elegance to every environment.

With its elegantly curved seat and precisely crafted metal frame, Cot redefines the aesthetics of modern seating. A balance of precision, comfort, and contemporary design, Cot is more than just a stool, it's an experience.

Cot

Designed for spontaneity and movement, Cot embodies the essence of modern living, whether for a quick coffee, a creative brainstorming session, or a moment of relaxation. The seat, available in natural wood or upholstered finishes, ensures ergonomic comfort while maintaining a sleek, minimalistic look.

Bolta

DESIGN / Regular Company

COLLECTION / Chairs

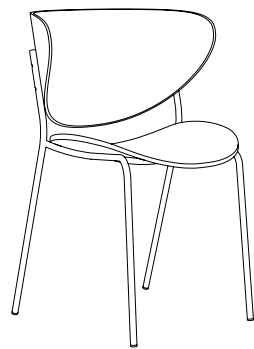

Designed with vision and created for moments of relaxation, Bolta is much more than just a piece of furniture, it is a story woven from the past, present, and future.

The carefully crafted wooden elements bring silhouettes of bygone eras to life in the chair, where traditional aesthetics meet modern design. Through a play of materials and precise craftsmanship, every detail of Bolta exudes elegance and sophistication, creating a sense of connection to the past while embracing a bold vision of the future. The contrasting tones of cool metal do not stand in a piece of furniture, it is a story woven from the past, present, and future.

Bolta

Whether placed in modern interiors or environments inspired by the past, Bolta's presence adds a touch of sophistication and thoughtful design that transcends fleeting trends.

Ruvo

The fabrics that envelop the seat tell a story – gentle or bold, simple or luxurious, always tailored to the one who chooses them. Every thread, every layer contributes to the character, giving the seat a soul that breathes in the rhythm of the space. From warm, soft fabrics that evoke a sense of home to smooth, elegant coverings that reflect refined aesthetics, the possibilities are endless, just like the dreams woven on quiet evenings.

Ruvo

Metal legs, with thoughtfully shaped geometry, are both support and a visual dance. They tell a story of stability and lightness, of strength and elegance, blending with the space in quiet harmony. Their lines reflect balance, creating the impression that the seat floats while firmly grounding itself – like thoughts that wander but always return home.

Dika

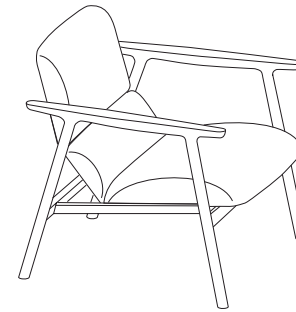

Dika is a contemporary take on a traditional armchair inspired by the Danish design from the mid-60s, whose name roughly translated means pride in the Slavonian dialect. Simple wordplay conceived by a designer from the region and made from locally sourced wood is the essence of Nuncs' brand promise, blending exceptional craftsmanship with modern technology. The armchair's design plays between curved and straight lines, creating a harmonious balance that is both visually appealing and structurally sound.

Attention to detail and the distinctive break in the lumbar area make Dika a comfortable yet elegant component of any public space or home environment. The soft and rounded solid wood pays beautiful homage to the comfortable foam seat, which is integrated with a cold steel construction that provides essential support. This combination ensures that the armchair is stylish but also durable and supportive, making it suitable for long sitting periods.

Dika

The silhouette of Dika, which has been modified and brought back, evokes a sense of nostalgia while maintaining a modern aesthetic. This blend of old and new makes it a versatile piece that can complement various interior styles. Whether placed in a living room, office, or lounge area, Dika stands out as a testament to the enduring appeal of mid-century design, reimagined for contemporary settings.

As its name suggests, *Mustra* carries multiple meanings depending on the region. It describes an unpredictable free spirit, a clever trickster, or a fabric pattern. This duality reflects the chair's versatility: refined yet daring, structured yet playful. Its carefully designed curves follow the body's contours, ensuring a comfortable seating experience without unnecessary bulk. This balance between minimalism and comfort makes it an inviting addition to any space.

Mustra

Inspired by adaptability and individuality, the Mustra Chair captures form and function in a strikingly minimal design. Constructed from durable metal rods its fluid structure offers a sense of lightness while ensuring exceptional strength. The chair's airy yet sturdy frame provides ergonomic comfort, making it a perfect choice for various settings, from contemporary dining spaces to stylish outdoor lounges. Its clean, modern aesthetic allows it to blend effortlessly into different interiors while maintaining a bold, independent character.

Mustra

Beyond its practicality, the Mustra Chair serves as a design statement, subtle yet striking. Whether used alone or as part of a set, it brings a unique personality to any environment. Mustra is more than just a chair; it's a presence, a pattern, and a story.

The Ala semi-bar table brings the same refined functionality as its taller counterpart, now in a versatile mid-height version. Designed to adjust between standing engagement and seated comfort, it creates an inviting space for collaboration, casual meetings, or moments of quiet focus. Its sleek lines and natural materials make it a seamless addition to offices, cafés, and dynamic workspaces.

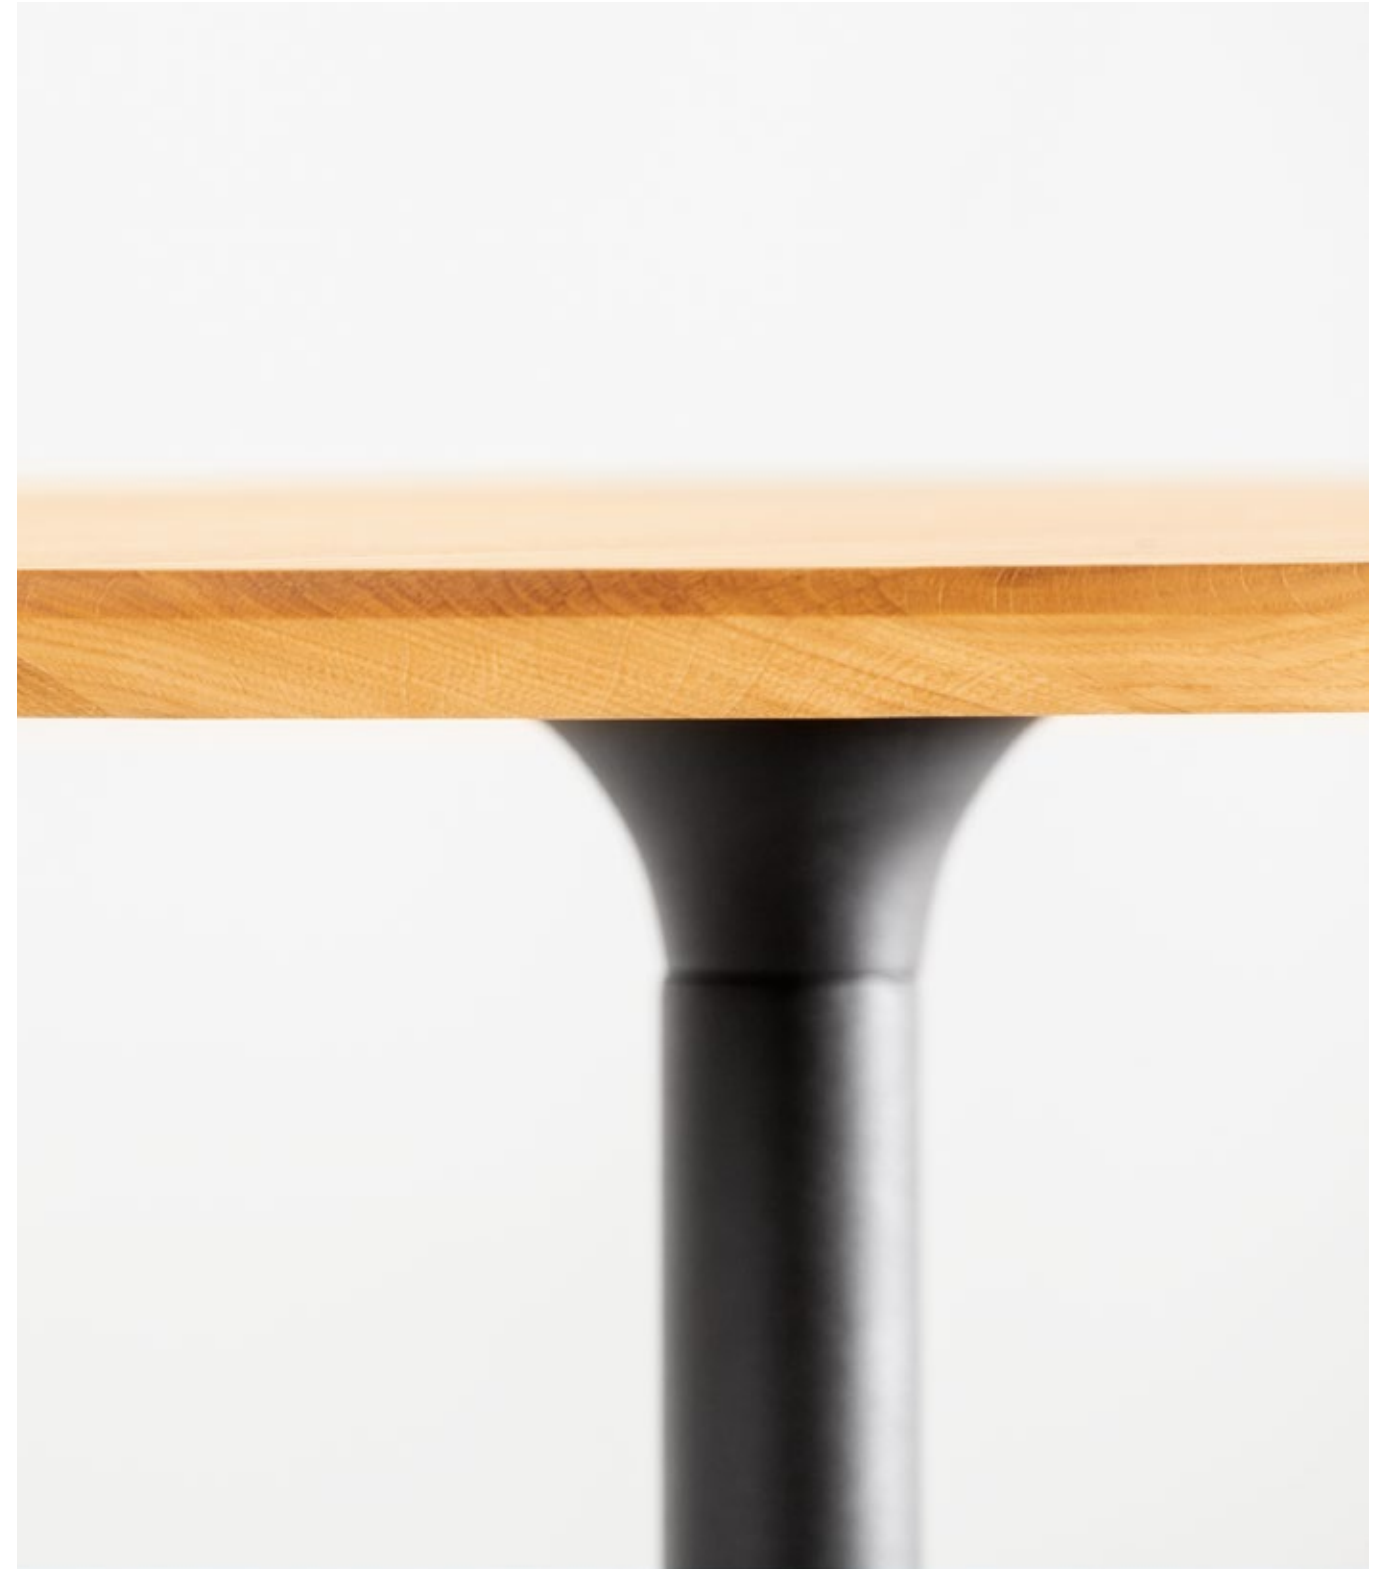

Crafted from solid wood and metal, it ensures durability while maintaining a light, modern aesthetic. Its thoughtfully designed height accommodates a range of seating options, making it an excellent choice for relaxed discussions, brainstorming sessions, or informal dining experiences.

More than just a functional surface, this semi-bar table can be a central point. With its ergonomic proportions and timeless design, Ala transforms spaces into flexible, welcoming environments, proving that practicality and style go hand in hand.

Jaro

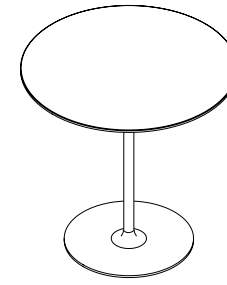

The tabletop can be crafted from various high-quality materials, including solid oak, American walnut, compact laminate, or innovative Fenix, known for its matte, fingerprint-resistant, and scratch-resistant surface.

Jaro, derived from the Turkish-Persian word Yar, meaning “friend” (a term commonly used in Slavonia), is a collection of tables and bar tables designed to focus on functionality and contemporary aesthetics. Its distinctive feature is the circular central base, made of powder-coated steel plate and tube, ensuring stability while maintaining a visually light appearance. A conical connecting element seamlessly joins the base components, adding a touch of elegance while enhancing structural integrity and durability.

Jaro

BAR, SEMIBAR
& BISTRO

With different tabletop sizes and base heights, Jaro offers remarkable versatility, making it suitable for diverse settings such as cosy café corners, upscale restaurant interiors, or stylish bar environments. The adaptability of this collection allows for the creation of dynamic setups that complement various interior styles.

Aman Taman is a genuinely unique cabinet that breathes with interior. In design, true brilliance lies in adaptability, the ability to transform without losing the essence. Aman Taman embodies this philosophy, a cabinet that seamlessly integrates into any space, evolving with your needs while maintaining its refined simplicity. It is a balance of form and function, a design that instils confidence in its practicality and aesthetic appeal, making it a perfect fit for any environment.

Aman Taman

Aman Taman

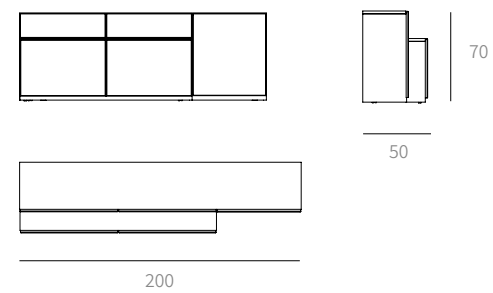

Designed to hold what matters: books, keepsakes, and quiet moments, it offers practicality and aesthetic harmony. Subtle yet undeniable, its presence is rather than seen; it feels like a well-placed pause in music, like the perfect play of light in a room, like home.

Retracted

Extended

Two separate modules, which slide underneath each other, create a playful cabinet named Duja. When the modules are stacked on top of each other, they form a monolithic volume, but when they are spread apart, their shapes become eccentric and elegant. Regardless of the wall length, the modules provide the optimal length for any composition.

Duja

The cabinet features a discreet design and the option to choose different colors, making it a perfect addition to any home. Its adaptability allows for various arrangements, from minimalist to sophisticated, easily fitting into different interior styles. The modules are not only functional but also add aesthetic value to the space.

Duja A & B

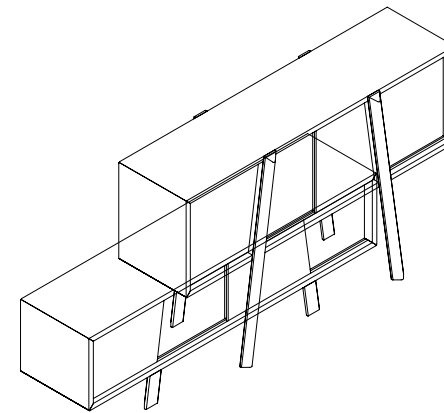

The combination of practicality and aesthetics makes this cabinet unique. Its ability to adapt to different needs and spaces makes it an ideal choice for modern homes. Whether used for storage or as a decorative element, the cabinet will surely attract attention and become a favorite part of your interior.

The interplay of these materials and forms enhances functionality and aesthetics, with the pouffes fitting snugly within the tables' main frame. This thoughtful design not only maximizes space efficiency but also encourages interaction and flexibility in use.

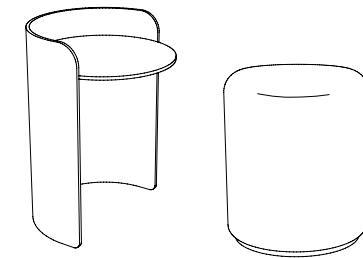

Skupa

Thinking of space as a geographical terrain where the interactions of its inhabitants are in a constant state of flux, Skupa is a collection of pouffes and side tables that evoke the image of an archipelago, continuously adapting to change when viewed from afar. Designed to reflect movement and balance, the collection creates a dynamic landscape within any interior, where each piece can stand alone or form part of a larger composition. Its modular nature allows users to reconfigure the elements effortlessly, making it suitable for evolving environments such as lounges, offices, or hospitality settings.

With the potential to create diverse arrangements, Skupa adapts to the needs of any space, whether through individual standalone pieces or interconnected clusters. The collection offers endless possibilities for customization, allowing users to experiment with layouts that suit their preferences. Whether arranged to foster collaboration in communal areas or to create intimate corners for relaxation, Skupa transforms the perception of furniture as static objects into an ever-evolving landscape that responds to the dynamics of its surroundings.

Skupa A

Skupa harmoniously combines contrasting elements—soft, inviting pouffes with structured, minimalistic side tables. The upholstered pouffes, available in various shapes and dimensions, provide comfort and warmth, while the sleek outlines of the metal or plywood side tables introduce structure and definition.

Materials

We prioritize innovation and collaborate with leading experts to continuously explore new techniques and materials. The choice of materials is a key focus in our design process, where we carefully consider each material, like wood, metal and fabrics. Along with factors like appearance, feel, and durability, we also assess the sustainability and lifecycle of each material.

Material finish

Our furniture collection includes solid wood from Slavonian oak, known for its durability and strength, as well as American walnut for a sleek, refined look. We also use veneer to construct furniture pieces, ensuring a high-quality, lightweight build. Additionally, metal is typically used for product bases, while compact plates are used for tabletops, ensuring durability and stability.

Designers

Nunc features designs by young regional designers and has won several prestigious awards. Nikola Radeljković, a well-known designer from the Numen/ForUse collective, plays a key role as creative director, guiding the brand's development. Nunc's designs blend contemporary interpretations of traditional Slavonian materials and craftsmanship, showcasing the brand's commitment to high-quality, flexible, and innovative design.

The immense cultural heritage embodied in Nunc's collection has been our drive over the years to start translating from the then to the now.

Our roots lie in solid wood and wood-based board furniture, built on decades of experience combining traditional wood-working with refined industrial production.

Nunc is based in Đakovo, in the heart of Slavonia, Croatia's fertile and culturally rich region, surrounded by the Danube, Drava, and Sava rivers.

Our production facilities stretch over 3,287 m², consisting of a 1,809 m² production and storage building and a 1,478 m² economic yard, providing the space and infrastructure to create contemporary furniture deeply rooted in local tradition.

Nunc's design language emerges from the intersection of diverse cultural influences, Central European clarity, Mediterranean warmth, and traces of Ottoman ornamentation.

This blend gives rise to a unique aesthetic that resonates with the layered history of the region.

The vast Slavonian landscape, generous and elemental, reflects in our work through the textures, tones, and natural materials we use, especially the revered Slavonian oak.

We see design as a form of storytelling.

Our products balance rational geometry with warmth and tactility, creating pieces that belong equally in urban interiors and traditional rural homes.

Each name in our collection draws from the regional vocabulary, an organic fusion of Croatian, Serbian, German, Hungarian, and Turkish expressions, capturing the everyday poetry of life in Slavonia.

Nunc is a vision of progress rooted in place.

Our furniture carries the spirit of a region where the line between interior and exterior life is fluid, where heritage and modernity coexist.

It is here, in Đakovo, that we shape each piece, bridging the then and the now.

About us

The story of the Slavonian oak is also one of craftsmanship.

Generations of skilled hands have passed down techniques that bring out the best in each piece of wood.

In our factory, traditional knowledge meets modern technology, allowing us to work with the material respectfully, preserving its integrity while unlocking its potential through contemporary forms.

Slavonian oak's natural resistance and warm, golden hues make it an ideal companion for modern living.

But beyond aesthetics, its presence carries something deeper, a sense of rootedness, resilience, and quiet dignity.

Every grain tells a story, not just of the tree itself, but of the land, people, and time that shaped it.

In choosing solid wood from Slavonia, Nunc chooses continuity, a link between past and present, forest and home, nature and design.

Wood resource

The rhythm of the sawmill is also one of precision craftsmanship.

Teams of experienced operators oversee processes that transform raw logs into refined structural elements and engineered surfaces built to last.

Within our facility, tested practices integrate with advanced machinery, enabling us to handle each board responsibly, maintaining its strength while shaping its performance for contemporary applications.

Drying cycles and precise cutting methods make it a reliable foundation for modern construction and systems.

Beyond production, the workflow reflects continuity, discipline, and a commitment to material intelligence and operational clarity.

Every plank carries a record of processing, from log intake to grading, optimization, and final dimensional calibration within controlled environments fully.

By sourcing locally and machining responsibly, Nunc maintains a connection between resource and result, industry and habitat, innovation and tradition today.

Sawmill

Crafted from high-quality, kiln-dried wood, each plank is carefully selected and treated to preserve its natural grain and texture.

The raw edges and organic imperfections add a rugged, authentic character that celebrates the inherent beauty of timber.

Ideal for use in furniture making, wall paneling, or bespoke interior features, these boards offer exceptional warmth and structural integrity.

Every piece is the result of precise craftsmanship, cut thick for durability, air-dried for stability, and finished to highlight its unique personality.

Whether featured in modern industrial spaces or rustic-inspired interiors, this wood serves not just as a material, but as a statement.

Engineered for comfort and support, the gently contoured backrest provides ergonomic benefits, while the spacious seat ensures a relaxed sitting experience.

The sturdy metal legs are reinforced with crossbars that add extra stability and also serve as a convenient footrest. This thoughtful design makes it ideal for extended use.

Production elements

Behind every piece of furniture, stands a team of skilled individuals, whose passion and expertise shape each detail with care and precision.

Our production process is not just a matter of machines and materials, but of hands that understand wood, eyes that notice every curve, and minds that never compromise on quality.

Each component is touched by the dedication of craftspeople, who take pride in their work, from designers, engineers, and machinists, to finishers and quality control specialists.

Their deep knowledge, gained through years of experience, is what transforms raw materials into functional beauty.

In our workshops, collaboration is key. Whether it's adjusting a mold by hand, inspecting every layer of finish, or ensuring every curve is ergonomically perfect, our team works with unwavering focus, and mutual respect.

This human touch is what gives our furniture its soul.

It's not just production, it's a craft, built with intention, patience, and pride, by people who care.

Production

What begins with raw materials and skilled hands, culminates in a refined product, that brings spaces to life.

Each finished piece reflects the harmony between form and function, a balance achieved through thoughtful design, meticulous craftsmanship, and a deep respect for the material.

The final product is not just a chair, but a statement of intention. With soft, ergonomic backrests, warm wood accents, and durable, stable bases, these pieces are created to support both body and atmosphere.

Whether placed in a conference room, a hospitality setting, or a curated interior, they invite comfort, focus, and conversation.

At the heart of it all is a commitment to people, those who create, and those who sit.

The result is furniture that not only performs, but inspires.

Final products

In the final stage of production, precision meets purpose.

Each product is carefully assembled by skilled hands, ensuring that every joint is secure, every surface aligned, and every component ready for use.

Our team works with attention to detail, driven by the knowledge that this is the moment where form and function come together.

Packaging is more than protection, it is a continuation of our care.

Every item is wrapped, cushioned, and boxed to preserve its integrity during transport, while maintaining the aesthetic standards we value.

From workshop to warehouse, and finally to your space, each step reflects our respect for the product, and for the people who will use it.

It is the quiet craftsmanship behind the scenes, patient, precise, and essential.

Packaging

From our production facility, our furniture begins its journey to destinations across Europe, Asia, North America, and beyond.

Every shipment represents the final step of a process rooted in precision, dedication, and care.

Once the product is assembled, inspected, and carefully packaged, it enters a logistics chain managed by experienced professionals, ensuring that each item reaches its destination safely, and on time.

Our team works closely with trusted freight carriers, coordinating road, sea, and air transport depending on the scale and urgency of the delivery.

Full truckloads, mixed cargo, and overseas containers are loaded with attention to detail, making sure that every box is protected, labeled, and traceable.

Export documentation, customs procedures, and international regulations are handled with accuracy, so our clients can rely on a smooth and transparent process.

Because for us, delivery is not an afterthought, it is an essential part of the story.

It is the moment when everything comes together, when craftsmanship travels, and when design finds its new home.
